

New !! Model 112 Series KON Electrical Perforating Machine

—Powerful Performance, Interchangeable Die-Blocks, Low Power Consumption—

- This new high power electric perforator is capable of performing widely diversified operations with a single main body through the use of interchangeable Die-Block units.
- The operation switch is of power saving, economical design and can be set in either of two modes: "motor runs only during perforating operations", or "continuous running".
- The model 112 series produces clear, easy to read perforations on paper or other similar materials. It contributes greatly to streamlined and efficient business operations, and at the same time assures protection against the possible alteration or forging of important documents or certificates.
